### ABSTARCT:

The purpose of this study was to identify some basic characteristic of bisexual adolescence and factor toward the development of the characteristic. This study is qualitative in nature, whereby the researcher used interview method. Two medium of communications used to complete the narrative of the study. As a result, this study reported that peer influent and less family attachment consider as the factor Bisexual characteristic. The comment characterise that has been examined in this research are, Bisexual will have multiple partner, they committed romance relationship and gratification each other, male adolescence will start the heterosexual relation before change to bisexual and lastly both partner will having same level understanding needed. As a conclusions this research has successfully prove that Bisexual among male also occur in Malaysia.

**Keywords:** *Bisexual1, Adolescence2, Characteristic3*

### 1. INTRODUCTION

According to the American Psychology Associations (2008) Bisexual can be defined as a sexual orientation refers to an enduring pattern of emotional, romantic, and/or sexual attractions to men, women, or both sexes .Bisexual also consider as part of Lesbian, Gay, Bisexual Transgender (LGBT) has been support by the Human Rights Council 2011. According to them there are 80 over 195 Nations in this world are support LGBT right .Despite of this there more than 100 Nations disagree with it, especially among Muslim country, because it is prohibited according to primary sources of Muslim;

*And Lot! (Remember) when he said unto his folk: Will ye commit abomination such as no creature ever did before you? (80) Lo! ye come with lust unto men instead of women. Nay, but ye are wanton folk. (81) And the answer of his people was only that they said (one to another): Turn them out of your township. They are folk, forsooth, who keep pure. (82)*

*It's also being emphasized in Hadith*

*Hadith narrated by Ibn Abbas: "Who do you get to perform homosexual acts slay both the perpetrator". [abu Dawud 4/158, Ibn Majah 2/856, At Turmuzi 4/57 and Daru Quthni 3/124].*

*Hadeeth of Ibn 'Abbas: "Allah has cursed anyone who commits an act of the people of Lut, (he mentioned it three times)" [HR Nasa'i in As-Sunan Al-Kubra IV/322 No. 7337]*

Even though this bisexual are consider prohibited and the *practitioners* will be punish in the court in the majority Muslim country, but the there are still people who followed and be a Bisexual. It is no exception too for Malaysian atmosphere. Nevertheless the contributions of Malaysian government in prevent these symptoms still in le early stages steep,because its has been found various type of LGBT group occur in Malaysia. Like what has been seen in the media such is Facebook (Malaysia Gay Community, Gay kedah/perlis/seluruh malaysia, Malaysia Bisexual,Malaysia Lesbian) tweeter s and blogger (*Malaysian PLU Story*:- The *Bisexual* Guy,MalayBoy88, My Men *Blog*<sup>TM</sup>: *Gay Malay Files* 01)

In this paper the focus of my studies is Bisexual of adolescence. His rate age is 19 years old which is consider as last age of adolescence scale. Referring on WHO 2012 adolescence can be defined as a person between 10-19 years of age.

### 1.2 Statement of Problem

Based on the LGBT population, Bisexual is consider as the and lest participant rather that Lesbian and Gay ,and it's also consider as rare chases among male rather than bisexual female therefore this research is emerge in order to identify male bisexual and comment characteristic them .

### 1.3 Significance of the Study

According to Sinclair Intimacy Institute compared to heterosexuality and homosexuality, very little scientific study has been conducted on bisexuality. Therefore this study is done and its will contribute in identify Bisexual person among adolescence based on the regular characteristic . Besides that this research also contribute in proving the fact that bisexual among male is exist because the case study has been done to the male adolescence.

### 1.4 Purpose of Study

The purpose of this study was to identify some basic characteristic of bisexual adolescence and factor toward the development of the characteristic.

### 1.5 Research Questions

The study answers two following questions:

- What are the factors that contributes to development of Bisexual characteristic?
- What are the basic characteristics of Bisexual Adolescence?

### 1.6 Definitions of terms

Bisexual: A sexual orientation refers to an enduring pattern of emotional, romantic, and/or sexual attractions to men, women, or both sexes(American Psychology Associations (2008) Sexually attracted to both men and women. (Oxford dictionaries Online)

Adolescence: a person between 10-19 years of age (WHO 2012)

## 2. LITERATURE REVIEW

Bisexual has been identifying happen typically among female rather than male as been mention by Freud (1963) bisexual characteristic most prevalent in female. The basic characteristic of bisexual is there well get interact with both gender male and female. Like what has been record by Advocates for youth right, respect, responsibility web about some adolescence statement about their inner in sting.

*“Being bisexual means we have the potential to be attracted to people of their own gender or another gender. Some bisexuals, like me, may be attracted to different genders in a different way; but basically, we are capable of loving more than just people of one specific gender.*

MIKEY, United Kingdom, age 14

*You might find that you like one gender more, or you might not. It depends on you.*

Irene, Ireland, age 19

*I always knew I was attracted to women, but I felt a pull towards men as well.*  
Suzanna, Maryland, age 17

There are various factor that could let to involvement of bisexual, it's could be as media, environment, peer imitation and family condition. Reported by Kornelis and Veenstra (2011); Beem (2010), peer play a major role in order to attract their friends exemplify this habits ,because it has been recorded many researchers that adolescence always copy and exemplify their friends attitude . Besides that Bearinger, et. al (2009), also found in their research that poor connection with family and lower education can be a factor let to bisexual .

The realization of bisexual usually emerge during childhood and typically 10-13 years old which are consider as early adolescence period (Queer Theory F11 2011). Furthermore according Sinclair Intimacy Institute there is difference between male and female Bisexual in term of the early stages of development whereby, for female they usually engage in heterosexuality before bisexual while for male they will began with homosexual first ,American Psychology Association (2008). APA also explain that most people have a stereotype thinking towards this people about their purpose of relationship ,it's been known as unhappy and dysfunctional, However the truth is they have committed romance relationship and gratification each other .

Besides that the emerge novel *Men Are from Mars, Women Are from Venus* has already describe the differences between man and women character .However its seem not applicable for bisexual ,its because they behave, act and understanding are in the same with their partner .Its has been prove through various experience by most of bisexual such what has been record in Yahoo!answer.com

*“With a guy, he can make me feel safe and protected as well as make me feel like he wants to end to me and hold me. Also they can be femmy and make me feel stronger about myself as i take care of them. (Me and my current boyfriend switch from top to bottom both sexual and emotionally, it's great.) He also seems to better understand me and feel for me. As long as they are not 20% over recommended body fat % I'm good. (No offence if that's your thing.) And of course getting penetrated feels great and it's really great when your doing it and he "explodes" while your inside.*

*Girls are a lot more complicated and demanding but thanks to my bisexuality I can see where they come from on certain topics and can relate and commute better. (BTW gay bar (for guys) is a great place to find straight women.) However when they cuddle up and I hold them its one of the best emotionally pleasing things and I never wanted those moments to end”* Maria

As nutshell it could be understood hear that Bisexual has been affect by various factor surrounding in their life .Besides that there are multiple characteristic of Bisexual that can be detected ,beginning in the early stages of adolescence , Therefore it has been agree that adolescence is the time teen face identity crisis in their life.

### 3. METHODOLOGY

This research is qualitative in nature whereby the researcher interviews a bisexual boy. The researcher interview the respondent three times, in the different period. After interview process all the data were collected and run through analyse process.

### 4. FINDING

Palo De is the nickname of a 19th years old adolescence. He was born in Kucing Sarawak and currently work in one of the Hotel in Klang Valley .Transmigrate from Kucing Sarawak to the one of the busiest cities in Malaysia has totally change his style of life. His stories began in this 2012 New Year celebration whereby he has been left by his friend s group and then incidentally he meet with gay people.

“Friendship “as the first stand of the relationship with this group people has change when one night he follow them hang on at the apartment. During this, he become totally surrender and submits himself to the other guy without asking. In the first moment he actually condense explain how it could happen but according to him for the sake of fell indebted and gratitude on many assistance from them ,Palo De just let it go.

After few months having relationship with them, Palo De could express his life now in happy and cheerful. Besides that he could feel that this relationship is not just searching of sexual sanctifications but also as a romantic partner also. Besides that Palo De also explain somehow been in relationship with them more comfort rather than others because as man to man there are complementary each other. Explaining more clarify character, Palo De elaborate that most of the gay are really take care, caring, supportive and not be hot-tempered. To that's moment this life style has interact him to be part of them.

Despite of this ,when I asking him about his feeling toward other girls, Palo De said that its still same as before, event according to him, he also have a gorgeous and beauty girlfriends now. Experience such this event he still keep it as a secret in front of his family ,and the only person who know details is his younger sister which is the closer relative to him This secret may continuously keep off from his parent information because what I could understood from his narrative Palo De parent spent less time at home rather than at outsider.

## 5. DISCUSSION

In this study it could be understood that, the basis factor let Palo De involve in Bisexual is Peer Influences. Besides that, less of family connection also can be associate as the side factor of involvement. Therefore, this finding is complying with finding of the previous study.

Next, the second research question which is comment characteristic of Bisexual adolescence I found some similarity and dissimilarity with the previous research .Firstly in term of age of emerging this behaviour, based on this studies Palo De only realise that he get attract with both gender in the end of adolescence times .Despite of this, previous study shown that childhood and early adolescence was the normal stranded age for bisexual noticed their habits. Second character is Bisexual will get interact with male and female, the feeling fall towards other gender and same gender are same, both of this gender may interact their feeling to fall in love. In this research it could be understood trough his explanation that Palo De have relationship with multiple partner. Furthermore based on the previous research it has been describe that male bisexual will experience a homosexual habits before changing to Bisexual. Nevertheless in this research Palo De seems experience opposite circumstance, whereby he already experience heterosexual before changing to Bisexual.

Besides that based on this case study it has been examined that Palo De and his partner are comfort each other with same level of understanding about their needed. He can discuss with both partner about same topic interest such fashion .Add on to this ,according Palo De gay behave not same as normal man who are more hot temper and fierce but they seem more understanding and comfort.

According Urban dictionary online romantic could be define as *“embody a certain ideal as a partner, or to be creative and innovative in a relationship and an illusion of idealised love/situation”* .It can be questioning in this research do bisexual people have experience a romantic relationship ever. Responding to this question I can said yes ,because it has been record that their relationship is based on two purpose which are sexual fulfilment and romantic relationship seeker citing Palo De words *“After began the relationship with gay ,I never feel regret but happy and sacrifice of it ” “I thing I become a gay for the romantic relationship and also sexual fulfilment “They treated me like a women, in terms of caress, calls and hospitality”*.

## 6. CONCLUSIONS

As a conclusion, the researcher found that Bisexual among male also occur among adolescence. Despite of this, with the limited additions of literature review and recourse about male Bisexual, this study still could be done successfully. Last but not list, it is recommended for future researcher to examined more Bisexual study among male, and correlated it with gay and lesbian.
